PROFESSIONAL SUMMARY

Full-Stack Developer and HND Computer Science student with hands-on experience building responsive web applications and REST APIs using Next.js, React, TypeScript, Node.js, Express, Prisma, PostgreSQL, and Firebase. Experienced in authentication, role-based access control, database integration, API development, and the development of practical software solutions, and trained in full-stack development at NotZero Academy with a strong interest in creating scalable, user-focused applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frontend: React, Next.js, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases: PostgreSQL, Firebase Firestore
ORM: Prisma
Authentication: Firebase Authentication, JWT, Role-Based Access Control
Tools: Git, GitHub, Postman, Swagger
Other: API Documentation, Database Design, Responsive Web Development

PROJECTS

AviFlu Monitoring System | Next.js, TypeScript, Firebase, Firestore, React Leaflet, Tailwind CSS

- Built a monitoring application for reporting and tracking Avian Influenza cases.
- Implemented authentication and role-based access for different user categories.
- Developed dashboards for monitoring reports, affected farms, and pending cases.
- Integrated Firestore for storing and retrieving monitoring reports.
- Built a consultation interface for processing and displaying patient records from Excel data.
- Integrated interactive maps for visualizing reported cases and geographical information.

ProjectRescue – Student Project Recovery Platform | Next.js, TypeScript, Node.js, Express.js, Prisma, PostgreSQL

- Designed a platform to help students collaborate on stalled projects, resolve technical challenges, and support project recovery.
- Developed backend architecture for user management, projects, tasks, rescue requests, and recovery progress tracking.
- Designed relational database models using Prisma ORM and PostgreSQL to manage project data, team members, and recovery activities.
- Implemented authentication, input validation, and authorization concepts to help secure application resources.

BACKEND DEVELOPMENT EXPERIENCE

Personal & Academic Projects

- Built REST APIs with Node.js and Express.js using controllers, services, middleware, and error handling.
- Implemented registration, login, password hashing, JWT access tokens, and refresh-token authentication.
- Designed relational database schemas and integrated PostgreSQL using Prisma ORM.
- Created and tested API endpoints and documented APIs using Swagger.
- Used Git and GitHub for version control and collaborative project development.

EDUCATION

Higher National Diploma (HND), Computer Science | Federal School of Statistics, Ibadan | 2026
National Diploma (ND), Computer Science | Federal School of Statistics, Ibadan | 2023

TRAINING

Full-Stack Development Training | NotZero Academy
